Reasons For Allowance

Claims 1, 11 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a digital peak discriminator comprising a noise threshold digital value is applied to one of the inputs of a data multiplexer and to the input of a negating and scaling unit, the output of which negating and scaling unit is applied to the other input of the data multiplexer; the multiplexer is connected so that its output is an input to a comparator; the comparator is connected so that its output is a data input to a flip-flop; the flip-flop is connected so that its output is applied to a selecting input of the data multiplexer, to an input of an exclusive OR gate, and to latching inputs of the maximum and minimum peak value latches and provides a pea detect signal. Also, in combination with other limitations of the claims the prior arts made of record fail to suggest a method of tracking peaks in an input signal by means of a tracking system that can be either a state for tracking maxima or input signal or a state for tracking minima of the input comprising simultaneously with a change of state, storing a maximum value of the input signal in a maximum holding register; tracking the minima of the input signal until difference between the tracked values of minima and the values of the input signal are greater than a predetermined threshold and changing the state to state for tracking maxima and simultaneously with the change of state, storing the minimum value of the input signal in a minimum holding register.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
